ABOUT ME

I am a skilled full-stack developer with extensive expertise in programming languages, including Javascript (both backend and frontend) and PHP. Additionally, I possess a strong foundation in other languages such as Ruby, Python, and C#. In my free time, I am dedicated to expanding my knowledge further by studying Elixir and Dart. My career journey has predominantly been as a freelance developer, and I gained valuable experience as a full-stack and backend developer at two technology startups. My unique blend of skills extends beyond development, as I have a rich background in design. This dual expertise allowed me to seamlessly balance both roles, enhancing my proficiency in frontend development. I am committed to continuous learning and staying abreast of the latest technologies to contribute effectively to innovative projects.

EXPERIENCE

Full-Stack Developer | Freelancer

2016 - PRESENT

- Web development using languages and tools such as: PHP, Javascript (NodeJS), Ruby(Ruby on Rails)
